“Monocles on Monsters!” - James, Writer & Developer 'Monocles On Monsters' is a steampunk twin stick shooter set in Victorian London where the crew of a paranormal investigation team have to hunt down the source of an evil that is spreading across the globe. You play as Nathaniel, a naive occult collector who's had quite the exciting life up to this point. You've been collecting magical artifacts, and came across one that left you understandably, extremely shaken. It was a relic, from a haunted clock tower in London, and we'll have to warn you, you're not going to be too happy when you find out what the relic actually does. The rest of your team are three extremely wacky paranormal investigators, brought to life by the same animation studio who brought you Teenage Mutant Ninja Turtles. “They're searching for light!” The team's airship, the HMS Scone, lets you customize your weapons. We know, it sounds crazy, but they're actually able to customise, upgrade and repair their weapons during the game. You'll take one from a variety of options at the start of the game, and throughout you'll find more and more as you progress and explore. When you're not using your special abilities, you can equip them to one of your four weapons that can be swapped at any time during a match. The Scone, for example, lets you equip a variety of melee weapons that have their own special attacks. The final piece of the gunfight puzzle is the crumpet cannon. You'll find a lot of other items that can be used to create special weapons when you recover them from your enemies. Our most important aim, as always, is to bring you fun and polished gameplay, and make sure we deliver a great experience that we're all proud of. We're excited about the game and the response we've received since releasing our pitch videos, but we want your help to see Monsters and Monocles through to completion. We're looking for your support and feedback on Steam (our site (and here on our subreddit, and we're really hoping that we're able to make a Steam

Cursed House is a first-person horror video game designed to reflect on those difficult times in life. In this game, the player becomes Yusuf Nazartsev. Yusuf is a 27-year-old Russian programmer. Following a tragic incident, his life has turned into a living hell. When Yusuf moved to the USA with his hopes and dreams of a happy life shattered, he was given a 2-storey house on the 5th level for \$295,000. On the day of his move, however, he decided to decline the offer, thinking the house's location is out of the way. However, what happened on the next day, he was shocked. The game is structured in such a way that the player is asked to guide Yusuf through the house, explore it and discover the reasons behind the tragedy. The gameplay and atmosphere are designed in such a way to make the player feel uncomfortable. There are many creepy scenes hidden in the house. Some of them are presented as a grainy picture using a slow framerate, and some have no movement at all, forcing the player to use their imagination. Also, there are many soft sounds that creep the player. The story evolves through exploring, investigation and dialogues. All of them are well-written and reflect on the difficulties that many people experience in their lives. Upcoming game being built with
